Organizes
Expert Talk On
**PROFESSIONAL ETHICS IN ENGINEERING
AND MASS COMMUNICATION**

RESOURCE PERSON

Mr. Shybin P Shibu
Central Head, Research and Development

REPORTER

ON

19th October 2023, Thursday

10.00am @ Digital Theatre

FOR ALL STUDENTS OF ECE

Coordinator

Ms. Aparna Jose, Assistant Professor, ECE

VISION OF THE DEPARTMENT

To achieve excellent standards in technical education and engage research in the field of Electronics and Communication Engineering creating employable and innovative professionals who can excel in global challenges.

MISSION OF THE DEPARTMENT

1. To practice innovative teaching and learning practices in Electronics and Communication domain with effective curriculum enhancement and Industry collaboration.
2. To inspire creative enquiry and innovation in students through excellent training programs and projects for professional skills.
3. To imbibe and ensure of teamwork, ethics combined with social responsibility in students.

DEPARTMENT OF ELECTRONICS & COMMUNICATION ENGINEERING

Outcome of the Event

The event was conducted to understand Ethics in engineering and mass communication are interconnected through their shared commitment to truthfulness, transparency, and responsibility. Engineers must communicate the ethical considerations of their work honestly, while mass communication plays a pivotal role in conveying this information to the public. Ethical reporting ensures accountability in engineering, helping to maintain trust and foster responsible behaviour in the industry. Mass communication serves as a platform for discussing ethical dilemmas, educating the public about engineering ethics, and promoting informed decision-making. Both fields aim to uphold shared values of truth and integrity, ultimately contributing to the responsible development and ethical communication of technological advancements in society and also for students, it's essential to understand that engineers have a duty to convey the ethical aspects of their work honestly, ensuring that potential risks and benefits are communicated accurately. Mass communication, including journalism and media, plays a pivotal role in disseminating this information, allowing the public to make informed decisions and engage in discussions about engineering ethics. These two fields share a commitment to truthfulness and accountability, which collectively contribute to the ethical development and responsible communication of technology, a crucial aspect of engineering practice in the modern world.
